

## Supplement Your Income: Part-Time Neuropathology in Boston

Since its founding in 2017, this life sciences organization has been on a mission to advance the care of patients who face the potential diagnosis of a neurodegenerative disease. With long careers in research and clinical care, our founding neurologists set out to unlock deeper stories within the skin by detecting key pathological markers in the peripheral nervous system that had been previously out of reach.

Details include:

- Opportunity to work 10-15 hours per week with flexibility in hours scheduled
- Supported by three NIH-SBIR grants
- Work alongside Dr. Christopher Gibbons, one of CND Life Sciences' three founders and a senior scientific advisor
- Accreditation by the College of American Pathologists
- Reading Syn-One and Small-Fiber DX tests by way of punch biopsies
- 1099 position
- 2,000+ Neurologists in network
- Pathology leadership team in Scottsdale, Arizona includes fellowship-trained dermatopathologists and neuropathologists

Sure, you've heard of Boston. The perfect destination for history buffs, sports fanatics, beer drinkers, marathon runners, and academics. But what if we told you it's also the city for music lovers, foodies, outdoor enthusiasts, cultural travelers, and, truthfully, anyone!
