

**SCHOOL OF MEDICINE**  
INDIANA UNIVERSITY

**IU Health Physicians**

## Neuropathologist

The Department of Pathology and Laboratory Medicine at the Indiana University School of Medicine (IUSM) in conjunction with IU Health Physicians (IUHP), is jointly recruiting a neuropathologist with strong diagnostic skills to join its neuropathology division.

The individuals selected will be based at the IU Health Central Pathology Laboratory (IUHPL). The neuropathology division is part of robust, subspecialized anatomic pathology group of greater than 50 pathologists with a plan for continued expansion. The neuropathology division serves 10 hospitals within the IU Health Hospital network, Eskenazi Health, and the Roudebush VA Medical Center, resulting in an excellent case mix. Additionally, the range of specimens is broad, including robust adult and pediatric surgical neuropathology (e.g. neoplasms, epilepsy, inflammatory/infectious cases), muscle and nerve biopsies, ophthalmic pathology, and autopsy pathology. Pediatric neuropathology is associated with Riley Children's Health, the only comprehensive pediatric hospital in the state with an active neurosurgery service. The neuropathologic divisions supports a comprehensive neuropathology fellowship training program for up to 2 fellows per year.

The division also supports the academic and research missions of the Indiana University School of Medicine which includes the Stark Neuroscience Center, the Indiana Alzheimer's Disease Center, and the IU Health Neuroscience Center.

### **IUHPL and Department Highlights:**

- Financially-sound department, which is in a stage of growth and expansion
- Stable environment with excellent retention practices and professional growth opportunities
- IUHPL is a 150,000-square-foot dedicated central laboratory building
- IUHPL has first-class facilities and serves as the centralized AP & CP testing facility for numerous IU Health hospitals and affiliated clinics performing 15 million diagnostic tests annually
- Environment that provides the ability to collaborate with a diverse cadre of subspecialized pathologists and clinical teams
- Processed over 100,000 cases through the central histology laboratory in 2023
- Faculty and administration engaged in promoting innovation and excellence in the education of medical students, residents, and fellows
- Strong support for translational research and clinical research activities should the successful candidate wish to pursue excellence in a subspecialty area of interest

### **Benefit Information:**

- Strong base salary that is not RVU based. Indiana was listed as "number two on the 2023's list of the top 10 highest paying states for physicians."

- IUSM and IUHP is committed to providing inclusive benefits for eligible employees and their families. to learn more, click here:
