

Pediatric Neuropathologist, Department of Pathology

Nationwide Children's Hospital

The Department of Pathology and Laboratory Medicine (DPLM) at Nationwide Children's Hospital (NCH) affiliated with the DPLM of The Ohio State University College of Medicine seek an academic anatomic neuropathologist at the level of assistant, associate or full professor to join one of the largest pediatric pathology and laboratory medicine departments in the U.S. The DPLM is in the midst of a 5-year multimillion dollar construction project. Anatomic Pathology is currently undergoing renovation and updating of the Gross Room and Histology Lab. Since the delivery of our whole slide imaging (WSI) scanner, we are in the process of validation for digital sign-out to be available by the second half of 2024. Neuropathology digital sign-out has been prioritized and is expected to be available sooner.

The successful candidate will join an experienced faculty of over 30 pathologists and doctoral scientists. Building upon an already premier program, the candidate has the opportunity to grow the academic mission of the department by providing excellent clinical care, education and/or research.

The DPLM accessions over 8,000 surgical specimens, over 1200 cytology specimens and performs over 90 autopsies per year. The Institute for Genomic Medicine (IGM) clinical laboratory processes 7,000 specimens a year. There is close collaboration between IGM and AP, and AP faculty participate in assessment of material submitted for clinical molecular testing as well as material submitted for the national molecular characterization initiative (MCI) for solid tumors. Neuro-oncology cases contribute to half of these cases.

Apart from the wealth of in-house patient cases from eight faculty members in Neurosurgery and five in Hematology/Oncology, there is exceptional opportunity for mentorship, collaboration, and growth and

development from participation in national clinical trials through the Children's Oncology Group, Head Start/NEXT Consortium Clinical Trial, and Collaborative Network for Neuro-oncology Clinical Trials (CONNECT). There is also great opportunity for collaboration with the Neurology Team and the cutting-edge work in neuromuscular disease at NCH.

The position will provide assistance to the Department's anatomic pathology laboratory, active learning curriculum for residents, graduate students, pathology fellows, and consultative services and Outreach Program. An active, ACGME accredited fellowship program in pediatric pathology is an integral component of the NCH DPLM. Faculty development and academic advancement is central to our mission so we have instituted a robust mentorship program with mentors at NCH and other respected institutions.

The Abigail Wexner Research Institute at NCH and the NCH Department of Pathology is home to one of the world's largest pediatric biobanks and is the site of multiple oncology biobanks. The Biopathology Core Resource of The Cancer Genome Atlas is also located in the Research Institute. The Research Institute is ranked in the top 10 nationally in NIH funding to free-standing children's hospitals.

Ranked in the top 10 children's hospitals on *U.S. News & World Report's* 2023-24 "America's Best Children's Hospitals Honor Roll," Nationwide Children's Hospital is one of the nation's largest not-for-profit freestanding pediatric healthcare networks.

Inquiries and nominations are encouraged. Please contact: Shamlal Mangray, MB, BS, Chief of DPLM and submit your CV and personal statement via email: Shamlal.Mangray@nationwidechildrens.org

To build a diverse workforce Ohio State encourages applications from individuals with disabilities, minorities, veterans, and women. EEO/AA employer.
